The Fitting

Our expert will evaluate your club setup during your private fitting and fit off a tour truck-style fitting matrix with different head and shaft combinations.

Data for every shot will be captured using Trackman technology to dial in each club to match your swing characteristics.

Fittings are conducted both indoors & outdoors.

Fitting Duration

30-60 minutes each

- Drivers/Woods • Irons
- Wedges • Putters

What To Bring

- If you have a current set of clubs, your current set of clubs serves as a baseline to start the fitting
- A pair of golf shoes or tennis shoes with good traction
